DETAILED ACTION

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, 23-37, 47 and 49 drawn to methods of depositing a silicon containing film on a substrate, classified in class 438, subclass 478+.
 - II. Claims 38-46, drawn to a system for processing a substrate and a processing tool for depositing a silicon containing film on a substrate, classified in class 257, subclass E31.041+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the methods of Group I deposits a silicon containing film on a substrate by using HCD gas, selectively depositing an epitaxial Si film on a crystalline film, and depositing and epitaxial SiGe film on a crystalline substrate. However for the system for processing a substrate and processing tool of Group II, all of the previously mentioned methods of deposition may be used for the deposition of the silicon containing film.
